

11-14-04

Thank you for your interest in 3dCarbon and our 2005 Mustang "Boy-Racer" project car.

3dCarbon was fortunate to have been selected by Ford Motor Company in early 2004 to build one of the few Mustangs that were to be unveiled at the 2004 SEMA show in Las Vegas.

Due to the limited time all of the selected project car builders had with the new Mustang most of the accessories unveiled at the show were in prototype form.

3dCarbon unveiled our project at SEMA and we were awarded the Ford "Best of Show". Since then we have been overwhelmed with inquiries. We appreciate your patience as we complete our development and tooling to produce the many products we developed for the Mustang.

THEME OF THE PROJECT

The balance between styling, aftermarket features and cost that influenced so many aspects of the 2005 Ford Mustang by 3dCarbon is evident right down to the wheels and tires. 3dCarbon tightened the tire-to-fender gap by integrating a body kit to emphasize the wheel stand and improve the suspension. A high profile rear wing and other exciting accessories create the new "Boy-Racer" one that is sure to turn heads even when the car is parked.

BASE VEHICLE

2005 Ford Mustang GT Coupe –Premium 5 Speed manual

POWERTRAIN

4.6L OHC 3V V8 engine w/ Whipple Super Charger – 500 HP

Billy Boat Performance Exhaust – Stainless Cat Back

CHASSIS

Brembo Brakes 14" Front Rotors – 13" Rear Rotors
Eibach Springs – 1" Drop

WHEELS & TIRES

HRE Performance Wheels - 940 Series 3-piece
Machined Aluminum forged 22" wheels
Pirelli PZERO NERO Tires 265/30ZR22 Front
Pirelli PZERO NERO Tires 295/25ZR22 Front

EXTERIOR BY 3DCARBON

Frequently Asked Questions:

1. DOES THE PARTS COME PRE-PAINTED?

Answer: Initially we will not be offering the parts pre painted. We plan on offering pre painted parts and kits early next year. In the meantime our national network of dealers and distributors will be able to support you.

2. WHEN WILL THE PARTS BE AVAILABLE?

Answer: We expect to start shipping parts in January – February 2005. Some parts will be available sooner than others, for instance the Factory Style Rear spoiler is available now and we will release the side Window Louvers in January.

3. HOW DO I BECOME A 3DCARBON DEALER?

Answer : Send us an e mail to sales@3dcarbon.com with your contact info. Name, Address, E Mail address, Phone, Fax etc. we will respond with a dealer package. Only companies that are qualified automotive accessory distributors will be considered.

4. WILL THE KIT FIT A V6?

Answer : Yes it will, however the rear bumper on a V6 has one exhaust. The 3dCarbon kit has two, you will need to do dual exhaust to make it look right.

5. IS THE KIT EASY TO INSTALL MYSELF?

Answer : Yes you could, but we recommend that you have a professional shop or experienced person do the installation. Please let us know if you need a qualified reference.

6. WILL THE "BOY- RACER" WING FIT THE FACTORY HOLES ON MY GT

Answer : Yes it is a direct fit, no extra holes are required.

7. WILL THE DI - CARBON FIBER WING FIT THE FACTORY HOLES ON MY GT?

Answer : No, you will need to fill the (4) holes from the factory wing.

8. WHAT ARE THE PARTS MADE OF?

Answer : The body kit is Urethane, the Boy Racer Rear Wing will be Blow Molded ABS.

9. CAN I PUT JUST THE FRONT OR REAR BUMPER ON A MUSTANG WITHOUT THE FENDER FLARES ?

Answer : Yes but there will be a gap, the front and rear are designed to be installed on the Mustang with the fender flares, side skirts and door caps. We do not recommend this.

10. CAN I BUY THE OTHER ACCESSORIES SHOWN ON THE 3DCARBON MUSTANG PROJECT CAR?

Answer : Initially we will only be selling the products listed below. Please contact the various other project sponsors involved in the project for information.

11. HOW DO I MAKE SURE I GET A KIT WHEN YOU START SHIPPING?

Answer: We are taking pre orders now, we will accept orders with Purchase Orders from distributors or Credit Cards for consumers, we will not charge the credit card for orders until we ship them. We also accept Pay Pal. Account name ernie@3dcarbon.com

12. WHERE CAN I PURCHASE THE PARTS FOR MY MUSTANG?

Answer : You can purchase direct from us or we can refer you to a dealer – distributor in your area.

13. HOW DO YOUR KITS ATTACH TO MY CAR?

Answer: The Front and Rear bumpers replace the factory bumper facias on the car, they are designed to install using the original attachment locations and hardware. The Side Skirts, Door Caps and Fender Flares are shipped with 3M Double Face Tape pre attached to the parts. There are screws supplied to attach these parts in the wheel and fender wells. The 3M Tape we use is the same type of tape that the car manufacturers use to attach body kits and moldings. We use special chemicals to prepare the surface of the part so if you remove the tape or have to replace it you will need to follow the recommended procedures outlined in our step by step instructions to insure good contact.

14. DO YOUR PRODUCTS COME WITH ALL THE HARDWARE I NEED FOR INSTALLATION?

Answer: Yes. We supply all of the necessary hardware to install the parts along with "step by step" instructions on how to install each part.

15. IF I DIDN'T GET INSTRUCTION, WHERE CAN I GET THEM?

Answer: If you need a copy of the instructions they can be downloaded and printed off our web site www.3dcarbon.com - tech tips. If you are missing the hardware simply contact our customer service department and they will get you a kit shipped as quickly as you need it.

16. DO I HAVE TO CHECK-FIT THE PARTS BEFORE I PAINT THEM?

Answer: We strongly recommend that you check fit the parts before you paint the parts. This will insure you have the correct parts and also allow you to check the fit prior prepping and painting. Parts that are prepped and or painted cannot be returned for credit or exchange.

17. CAN I BUY THE STRIPES SHOWN ON THE 3DCARBON MUSTANG PROJECT CAR?

Answer : The White project car we built had painted red stripes. There will probably be companies soon that will offer a vinyl stripe kit. Check back with us for additional info.

18. WILL YOU MAKE CUSTOM KITS FOR OTHER CARS?

Answer : We will be offering other body kits and accessories coming soon, check the web site for information on new products as they are available.

19. HOW IS THE KIT SHIPPED?

Answer : It will be boxed in one large carton. The estimated freight cost from 3dCarbon will be approx. \$150.00 Freight prices may vary.

20. WHAT IS THE HOOD MADE OF?

Answer : We want to make the hood of Aluminum just like the Factory Mustang Stock hood. We are working on the development of the hood now and will have more information available soon.
